Entered at the Postoffice at Wheeling, W. Va., as second class matter.

WHEELING, MARCH 8, 1889.

YESTERDAY'S weather was assorted enough for St. Patrick's day.

FROM his baptism of March 4th we may expect it to be a cold water Administration.

"WEASLY" lies the head that wears a (two-toe) crown.—*Ex-King Milan, of Serbia.*

"SHAKE my hand off, shake my hand off, shake my hand off."—*President Harrison.*

WEST VIRGINIA, thanks to Democratic manipulations, is getting a great deal of a certain sort of advertising.

PHILADELPHIA'S ill treatment of his wife has helped to make Milan, of Serbia, a miserable and impotent potentate.

BEFORE New Mexico come in she will have to be re-peopled. More than area and numbers is required to make a State of this Union.

SUNDAY gentlemen who desired to be in the Cabinet wish it well but think it doomed to failure. What a critical and doubting world this is!

GERMANY will not be quick to pull the ear of the Harrison Administration. Don't you suppose the Great Powers know whose ear to pull?

QUEEN VICTORIA is to give her grandson, Emperor of Germany, the G. O. B. He will be fortunate if his people don't give him the G. B. Nations expect more of their sovereigns than formerly.

PRESIDENT CLEVELAND vetoed 278 bills, 157 more than were vetoed by all of his predecessors put together. Yet the line of Presidents from Washington to Cleveland includes some "likely" material.

If you want to get into a certain exclusive club in Japan you must show your capacity to hide under your waistcoat at least seven bottles of strong drink. And shall it be said that civilization is to the heathen as pearls before swine?

A NEW YORK druggist has been censured by the Coroner's jury for selling sixty grains of morphia twice a week to a thirteen year old child without a prescription. The child got the poison once too often and her mother was found dead in her bed. Something more than censure will be required to put an end to a profitable business.

THE use of electricity increase so fast and in so many directions that it is hard to keep pace with them. The incandescent light is now being used in our war ships, and even the guns are so arranged that the captain, standing on the bridge, by touching a button can give the enemy a broad broadside. Of course it will not be long before the enemy will touch off his broadside in the same way.

THE Philadelphia Press has been making so good a newspaper that it is obliged to make more of it every day. The Press is a great newspaper in a great field which responds to its skillful and honest cultivating. In point of profits it stands No. 2 among Philadelphia newspapers—a substantial recognition of its intelligent, all-the-year-round championship of the right of Americans to take the first cut at the great American loaf.

THE fourth of March should be stricken from the calendar and a later day substituted. The fourth of March almost invariably behaves badly once in four years. The Ingalls measure, which passed the Senate over a year ago, fixes inauguration on April 30. But there are years when this day falls on Sunday. It would be easy to make the day a "moveable feast," as for example, the last Friday in April has been suggested. At all events let the Fourth of March be abolished for bad behavior.

RECENTLY some times has it—has Editor Whitelaw Reid, of the New York Tribune, asked for the English mission Editor Murat Halstead for the French or German. The President could not make better selections. Both of these men come up to the requirements of capacity, character and services rendered to the party and the country. While the President is about it, there is Editor Charles Emory Smith, of the Philadelphia Press, who would grace any diplomatic post. The man, the newspaper and the State are big enough for something first class.

THE main street bridge.

The temporary bridge on Main street should be regarded as very temporary in its character, and the length of its service should be made as short as possible. The bridge itself seems to be well enough to meet an emergency, but it has been so placed that the approaches are about as unsightly, inconvenient and discreditable to the city as they could well be. The possibility of high water will be a constant menace to the structure while it stands. It is too low for even a makeshift.

The people of Wheeling will certainly not be satisfied with this bridge for any longer time than it will take to get a permanent structure, more convenient and creditable. The questions to be decided are the material of construction and the width, upon which questions hangs the other one of the cost. The estimate for a stone bridge the width of the street is \$75,000—an expenditure which the people are not likely to approve at this time. Nor ought they, for a bridge to meet all the requirements may be built for half the sum proposed, perhaps for less than that. This would be a structure of iron or steel, about thirty-five feet wide.

A stone bridge presents, besides its greater cost, the additional objection that bed-rock lies so far below the sur-

face of the creek as to be impossible to reach without an expenditure simply prohibitory. Without a bed-rock foundation it would be bad business policy to build a stone bridge.

A bridge the width of the street is not necessary, because the bridge footway is not to be encumbered as the sidewalk is with all sorts of merchandise, and because merchants will not use it as they do to a considerable part of the street, as a standing place for wagon loading and unloading. The Market street bridge is not the width of the street, and that accommodates always a large traffic, and now the traffic of both bridges.

If Council will submit a loan ordinance providing for a substantial steel or iron bridge, of width enough for business purposes and no more, the people will be likely to approve it. It will be a waste of time to try the \$75,000 proposition.

New York's Society Volcano.

A great ball is to be a prominent feature of the George Washington celebration in New York. A great opening quadrille is to be a feature of the great ball. It is the fond hope of the management that President Harrison, the Chief Justice of the Supreme Court of the United States and other high dignitaries will consent to trip the light fantastic toe in the said quadrille. But it isn't to be a stag dance. Hence the trouble. Who are to be the partners in the dance of the mighty men who must take dancing lessons for the great occasion.

A sub-committee of the committee on arrangements had it all arranged. The fortunate fair ones were to be women in whose patrician veins runs the rich blue blood of the Revolution. Those dames were delighted, but other dames were not. The wives of husbands of revolutionary stock and fat purses insisted that the status on this occasion should be regulated by decent male, and so the committee is said to have decided on mature reflection.

Thus it happens that a blue-blooded woman, whose husband's status as a relic of '76 does not entitle her to skip in the quadrille, must undergo the mortification of seeing her brother's wife, whose great-grandmother may have washed clothes for her great-grandfather, gliding through the quadrille—"the impudent thing!"—as the partner of the President or the Chief Justice.

The irreverent may be disposed to indulge in the laugh over this sort of thing, but it is remembered, it is all going on within the ranks of the noble Four Hundred who, as society cream, are the very top of the pan. What are Presidents and Cabinets in comparison with events of this supreme character?

A Fine Pick for Pickings.

The proverbial gaiety of the French keeps them in good humor when men of Saxon blood would be tearing out somebody.

After the loss of their millions in the Panama canal scheme, in spite of the mortification over the utter and disgraceful wreck of an enterprise which was to have shed glory on the country and given it a fresh hold in the new world, the French are actually laughing over the collapse.

Here is a suggestion for the next adventurer who seeks a field where the pickings are good and the people do not get angry and tar-and-feather anybody when the smash-up comes.

OUTSIDE VIEWS OF WEST VA. POLITICS.

The "Two" Case Which Vexes Governor Wilson Notoriously.

Washington Special Political Commercial Gazette (Rep.)

Hon. Charles Smith, of Parkersburg, W. Va., the counted-out candidate for Congress from the Fourth Congressional district of that State, left for home to-night. Mr. Smith has been in the city for several days presenting his claims for recognition to the various leading Republicans who are still here. Each one to whom he has told his story has characterized Governor Wilson's action as an act of gross and malicious political treachery in the history of the country. This afternoon, along with General Grosvenor, of Ohio, he made an attempt to call on President Harrison, but the crowd was so great that he found it impossible to get within gun-distance. His intention was to present his case to President Harrison as a fair sample of some of the political methods of Southern Democrats. Two minutes' time would have been sufficient for him, but he was forced to postpone his explanation to a future date.

The case has been dubbed in this city, as well as in West Virginia, the "two case," for the reason that in Pleasant county, which is in the Fourth Congressional district, the Clerk of the Circuit Court certified the returns of the late election to Governor Wilson, and instead of placing Judge Jackson, Smith's opponent, at 802 he wrote it in full, and in spelling the word two neglected to loop the two, making the two appear "two."

Governor Wilson took it upon himself to decide that the "two" stood for twelve and so returning it gave Judge Jackson a certificate of election. This certificate has been presented to the Clerk of the House of Representatives, and Judge Jackson's name has been placed on the roll. Some of the leading Republican members of the next House are busy formulating a scheme by which objection can be made to Judge Jackson taking the oath of office, and if successful the Republican majority in the next House will be one more than is not counted on.

As a Breath—and a Mad One.

Philadelphia Press (Rep.)

When it became apparent last November that the majority in the House of Representatives would be small one way or the other it was conjectured that there would be enough Republicans counted out in the South to give the Democrats control. There was one district each in Louisiana, Tennessee, North Carolina and Maryland and two in West Virginia which showed small pluralities for the Republican candidates on the face of the returns. Past election methods in that neighborhood justified the fear that some pretext would be found to change the result and give the certificates to the Democrats in those districts. In the first four States, however, the figures were allowed to stand and a Republican majority in the House was assured. It remained for Governor Wilson and the Democrats of West Virginia to justify the apprehensions and show to what lengths a man and a party can go when actuated by blind partisanship. But their triumph will be of short duration, as a Republican House will seat the candidates who were honestly elected in West Virginia.

Brother Carr.

Pittsburgh Commercial Gazette (Rep.)

While Goff and Wilson fight over which of the Governor, Carr expects to walk off with what they are fighting for. A shrewd man is Mr. Carr, and one of much gall.

Not Exactly.

Louisville Courier Journal.

A West Virginia newspaper, some years ago, went out in its advertisement headed, "Snappy, and Bright," and ever since it has been receiving subscriptions

addressed to "Messrs. Snappy & Bright, Publishers," etc. No wonder it takes that sort of people four months to make out their election returns. Perhaps this accounts for the curious fact that no less than four West Virginians are now claiming to be the true and only legal Governor of the State. They are not all Snappy & Bright, either.

The Boldest Conspiracy.

Kalamazoo Telegraph (Rep.)

No one disputes Goff's majority on the face of the returns, but the Democrats are determined to steal the office from him by the boldest conspiracy.

Heilich, Governor-elect.

The story of Pigott's forgeries and suicide while more sensational than that of LeCaron, a witness who preceded him before the Special Commission in London, is not nearly as fascinating as the career of this man. Pigott was a clumsy bungler in comparison with LeCaron, who would make an excellent subject for a novel in the hands of a master in handling complicated plots. LeCaron's revelations, happily for the Parnell case, preceded the confession, flight and death of Pigott, which obscured, to the vision of most people, their power, regarded by themselves, to prejudice the Irish cause.

LeCaron's real name, it seems, is Beach. He has lived in this country since 1861, and has had the unobstructed opportunity to know the secret business of the Clan-na-Gael. He claims to have had interviews with Mr. Parnell in London in 1881, when the great Parliamentary leader, he says, impressed on him the necessity for a good understanding between Irishmen who advocate the use of physical force against England and those who wish to promote national objects by assisting the party led by Mr. Parnell.

LeCaron is a graduate, in the class of 1872, of the Detroit Medical College, and has traveled all over the world. He has traveled all over the world, and practiced medicine in the State of Illinois. Other parts played in his remarkable career have been those of an active member of the Grand Army of the Republic, a Fenian in Canada in 1865, "organizer," Nationalist, etc. Our picture of the man is an accurate one, and is obviously that of a very extraordinary man.
